

Supporting local communities

At Lightsource bp we prioritise being good neighbours to the local communities in which we operate. It is important to us that communities have an opportunity to hear about our proposals and provide us with feedback. We are also committed to ensuring our solar farms play a positive role within their local ecosystem – supporting and enhancing local flora & fauna.

We do this in a few ways:

 Holding accessible information events

 Creating regionally adapted biodiversity net-gain plans

 Offering local employment opportunities

 Hosting open days and guided tours of our operational solar farms

 Providing community benefit funds where appropriate
