

PROPOSED CONSTRUCTION TRAFFIC ROUTING

The proposed solar farm will be accessed from a new track off the private road serving the Aviagen Turkeys Ltd site. During construction there will typically be up to 15 HGV deliveries per day in addition to construction staff movements. A Construction Traffic Management Plan (CTMP) will be submitted with the planning application to manage construction traffic which is estimated to last for a 5-6 month period.

The site has good access to/from the A1 to the west along the B1174 Great North Road. The proposed HGV routing for the proposed solar farm is shown on the 'Site Context Plan' below.
