

PROPOSED CONSTRUCTION TRAFFIC ROUTING

It is proposed that the construction route to the site will be taken from the A19(T) interchange using only the B1280 and Hurworth Burn Road. Construction traffic will not travel through Sheraton Village. This is shown on the 'Construction Vehicle Route Plan' below.

During construction there will typically be around 10 HGV deliveries per day in addition to construction staff movements.

A Construction Traffic Management Plan (CTMP) will be submitted with the planning application to manage construction traffic which is estimated to last for around a 24 week period.
