	Camera Location (OS Grid Reference):		240452 E 386673 N		Horizontal Field of View:		90° (Cylindrical projection)		Photo Date / Time:		05/03/2024 14:20		This wireframe is based upon LiDAR digital terrain data with spot heights at 2m (which does not precisely model small scale changes in landform or sharp breaks in slope). The three dimensional model is based on the proposed layout. The Type 2 wireline visualisations do not account for any embedded mitigation or visual screening that may be provided by proposed vegetation between year 1 and 15 of operation.
